BUILD YOUR OWN BIRDHOUSE!

With this DIY birdhouse, you can welcome more birds into your backyard by repurposing your cleaned cartons. This project is fun for all ages and will provide a cozy home for your avian visitors.

STEPS

1. Cut a 1 – 1.5” hole in the center of one side of the carton.
2. Beneath the hole, cut a small hole to put the stick through, providing a perch for birds.
3. Cut a hole at the top to pull the rope through for the birdhouse to hang from.
4. Paint and decorate your birdhouse.
5. Hang in a spot about five feet from the ground.

MATERIALS

• 1 milk or juice carton
• rope / cord / ribbon
• stick / chopstick
• acrylic paint
• paint brushes
Where birds thrive, people prosper.

From urban centers to rural towns, each community can provide important habitat for native birds.

In turn, birds offer us a richer, more beautiful, and healthful place to live.

Support our efforts to protect birds and restore critical habitat in Louisiana.
